PROFILE

MSc Artificial Intelligence student at ECE Paris (Grande École), specialized in LLMs & multi-agent systems, computer vision and generative AI. Coursework covering Multi-LLM architectures, cloud computing for AI, data security and business process automation. 2 years of experience in Test & Validation with a methodical, analytical approach. Skilled in evaluation methodology and optimization of complex systems to ensure quality and performance.

EXPERIENCE

KPIT Engineering <i>Test & Validation Engineer (permanent)</i>	Sep 2024 – Feb 2026 <i>Sfax, Tunisia</i>
- Validation of automotive software for BMW ECUs via a Zuul CI/CD pipeline; diagnosed hardware vs software defects - Contributed to evaluating an AI-based reporting system (TestGuide, TraceTronic); validated predictions, identified errors and gave structured feedback to improve reliability - Analyzed and resolved 300+ anomalies (infrastructure, software versions, test cases) – ~80% resolution rate - Developed a Python script to generate daily Excel reports - Ran 50+ electrical-load tests for BMW system validation	
Krichen Distribution <i>WordPress Developer (Freelance)</i>	Feb – Aug 2024 <i>Sfax, Tunisia</i>
- Set up and maintained the WordPress platform, ensuring smooth operation - Managed product catalogs (700+), pricing, stock and automated notifications - Integrated secure payment systems and configured servers and SMTP - Improved performance, SEO and mobile responsiveness	
SAGEMCOM <i>Web Developer (Final-year project)</i>	Feb – Aug 2023 <i>Tunis, Tunisia</i>
- Built an intuitive web application to automate test configuration and execution via Robot Framework and Selenium - Dockerized solution for seamless cross-platform deployment (Windows, Linux, macOS) + validation report generation - Optimized internal test workflows, significantly improving automation efficiency	

EDUCATION

ECE Paris (Grande École) <i>MSc (M2) — Artificial Intelligence</i>	2025 – 2026 <i>Paris, France</i>
Coursework: Multi-LLM Architectures, Gen AI & Diffusion Models, Computer Vision (Industry 5.0), Cloud Computing for AI, AI Transformation, Security & Data Protection, AI for Business Process Automation.	
ESPRIT <i>Engineering Degree — Software Engineering</i>	2021 – 2023 <i>Tunis, Tunisia</i>
ENET'Com <i>Bachelor — Information Science & Technology</i>	2017 – 2020 <i>Sfax, Tunisia</i>

PROJECTS

Digital Transformation Roadmap Generator <i>Python, Multi-agents, RAG (FAISS), Gemini, FastAPI, Streamlit</i>
Multi-agent RAG system (6 agents) turning a free-text business case into a structured roadmap; dynamic routing to the optimal LLM. ECE M2 project — Multi-LLM Architectures.
AI CCTV — Harassment Detection <i>Python, PyTorch, CLIP, YOLOv8, Streamlit</i>
Zero-shot video detection (CLIP + YOLO) with no abnormal training data; real-time Streamlit dashboard + automatic Telegram alerts.
Grid Shooter — REINFORCE Agent <i>Python, PyTorch, Gymnasium, Pygame</i>
REINFORCE (policy gradient) algorithm on a custom Gymnasium environment with live Pygame visualization. ECE M2 RL project.

TECHNICAL SKILLS

LLM & Generative AI: LangChain, RAG, multi-agent systems, Hugging Face Transformers, prompt engineering
ML & Vision: PyTorch, TensorFlow, Scikit-learn, CLIP, YOLOv8, OpenCV, Whisper, Gymnasium (RL), Pandas, NumPy
Programming: Python, SQL, JavaScript, PHP ; Flask, FastAPI, Streamlit
MLOps / DevOps / QA: Docker, Git, CI/CD (Jenkins, Zuul), Linux, Bash, Robot Framework, Selenium, Pytest, Scrum/Agile, Jira
Languages: Arabic (native), French (C1 — TCF), English (B2 — IELTS)

CERTIFICATIONS

Scrum Fundamentals Deep Learning Specialization (Coursera) Machine Learning Specialization (Coursera)

OTHER

Volunteering : IEEE ENET'Com (Alumni, 2018–2020), Lions Club Méditerranéen (Alumni, 2019–2020), PMI Member
Interests : Football, Chess, Reading
